

The Bearded Collie Breed Liaison Committee

The JBLC have been very pleased with the positive response to the Breeders Workshops.

The final workshop will be held on: **11th February 10am-4pm**
at **Finningley Village Hall, Rectory lane, Finningley, Doncaster DN9 3DA**

Entry is free - if you would like to attend, please register your interest with:

Lesly Tomlinson - Tel:01332 880793 or email: coalacre@btconnect.com

or

Sylvia Newton - Tel: 01609 882574 or email sylvabrae@hotmail.com

So come along and have your say on issues facing the breed and potential solutions

~

Save the Date!

The follow up to the Breeders Workshops will now be on **Saturday 13th May at Tollerton Canine Academy** and not April 8th as previously advertised. The JBLC are delighted to announce that Dr Tom Lewis (KC Geneticist) and Dr Katy Evans (involved in the KC Breed Health and Conservation project) will be attending. This will be an opportunity to discuss proposals and plan for the future of our breed with the experts. More information to follow.

~

The JBLC would like to say a **big thank you** to all those who have Beardies with Addison's and have contributed samples to the Addison's research project being carried out the RVC. Research is now underway but the RVC would be grateful for even more samples to ensure they have sufficient for their work. Blood and serum from newly diagnosed Beardies with Addison's is most valuable but blood from any **Beardie with Addison's** can be used. They can also use **more than one sample** from the same dog. So if you haven't donated yet or you have and are willing to submit another sample **please do so!** More information, the owner Information sheet and sample submission form can be downloaded at www.rvc.ac.uk/about/our-people/brian-catchpole#tab-research
